Education

Indian Institute of Technology, Kharagpur

2021 – 2025

Bachelor of Technology in Metallurgical and Materials Engineering (CGPA: 7.91 / 10.00)

Kharagpur, West Bengal

- **Relevant Coursework:** Programming and Data Structures, Prob & Stats, Advanced Calculus, Linear Algebra, Network Security, Distributed Systems

Experience

Software Engineer - Backend | FinBox | Bengaluru

Jun 2025 – present

- Engineered Temporal-based workflow engine with configurable serverless journeys, eliminating hard-coded client-specific logic
- Built internal developer tool **Thanos** for configuration and database operations without manual queries, accelerating releases
- Integrated **OpenTelemetry** observability for workflows, **improving debugging** and traceability across lender APIs using **Grafana**
- Shipped no-code **Journey Builder** enabling lenders to configure and deploy **LOS** onboarding workflows using reusable blocks
- Implemented **context propagation** across codebase, enabling correlated traces, logs, and Sentry events for workflows in Grafana
- Migrated CRON jobs from **Apache Airflow** to **Temporal Scheduler**, enabling fault-tolerant and replay-safe execution pipelines

Full Stack Mobile Developer | Qualitative Financials | Remote

Sep 2023 – Feb 2025

- Built a **cross-platform marketplace** application connecting service providers and users through **scheduled video consultations**
- Established secure **Google OAuth 2.0**, **JWT** for user authentication, and integrated **PayPal** for in-app payments and payouts
- Incorporated the **Google Maps API** to facilitate the discovery of **500+** creators employing a database hosted on **MongoDB Atlas**
- Containerized the full-stack application using **Docker**, streamlining deployment and improving development workflow consistency
- Integrated **Agora Video Call SDK** and third-party APIs in **Node.js**, facilitating efficient video call scheduling with service providers

Tech Intern | MyGate | Bengaluru

May 2024 – Jul 2024

- Optimised brand onboarding systems in the **Community Engagement Platform**, increasing the user interaction on the app by **72%**
- Automated business operations using JavaScript and Python scripts, which saved more than **10,000** working hours in a single year
- Created features allowing brands to manage physical and digital marketing campaigns in **27,000+** MyGate powered societies
- Devised an automation testing framework constructed over **Selenium**, reducing testing time from **3 hours** to just **5 minutes** daily

Projects

National Students' Space Challenge (NSSC) 2023

React, Node.js, MongoDB, Azure, Github Actions, AppScript, Firebase

- Implemented a QR-based management system for the team of NSSC 2023 for offline participant management throughout the fest
- Devised an Admin Portal that enabled management of over 1,000 fest participants' payments and submissions in competitions
- Deployed the **Node.js** backend to **Microsoft Azure** using the App Service tool and established CI/CD pipelines via **Github Actions**
- Designed and developed the last two years' official website and integrated Townscript for events payment and merchandise orders
- Built a WYSIWYG **space blogging platform** using CKEditor and Firebase, enabling the team post blogs directly from Google Docs

Employee Claim Management Software

React, Node.js, MongoDB

- Developed organisation-wide **reimbursement software** using React, Node.js, and MongoDB for employee claims management
- Constructed features for processing of travel, out-of-office stays, food bills or any other reimbursements the organisation offers
- Integrated **Google Maps API** for distance measurement and reimbursement amount calculation based on the company's policy
- Formulated and applied a **hierarchical authorisation system** for account manager, HR, accounts team, and admin responsibilities

Air Canvas

Python, OpenCV, MediaPipe

- Created a **Computer Vision** based software that allows the users to paint on the screen using different hand gestures via a webcam
- Introduced the **MediaPipe** and **OpenCV** python libraries for the extraction and geometric evaluation 21 points on the user's hands
- Ideated and developed a range of functionalities, including selection of colours, resizing of paint brush, erasing and capturing screen
- Implemented **real-time gesture recognition** pipelines with optimized frame processing for smooth **low-latency** user interaction

Technical Skills

Languages & Frameworks: C++ | Go | TypeScript | Python | SQL | React Native | Next.js | Node.js

Tools: Azure App Service | EC2 | S3 | MongoDB | PostgreSQL | Redis | Temporal | Grafana | Docker | GitHub Actions | Firebase
